

PHOTOGRAPHIC SCANNING AND PRINT SERVICE

A comprehensive scanning and print service is available. The latest Epson scanners and printers are used together with the "Perma-Jet" printing system. All systems are colour calibrated using Monaco EZ Colour. You may wish to use this service in any of the following ways:

1. Scanning existing prints, negatives or transparencies (slides) and printing new copies for friends and family.
2. Scanning old or damaged prints, which can then be digitally repaired prior to printing new prints in colour, black & white or sepia. The original colour is irrelevant.
3. Companies may wish to make better use of their photographic resource and bring it up to date by exploiting digital technology. A corporate service is available from simply scanning existing prints through to organising and managing a photographic library and supplying digital files and/or prints to customers, dealer networks, publications, staff etc. etc. This is a bespoke service.
4. Preparing photographic material for personal (e.g. weddings) or company presentations.
